## UNDERSTANDING THE JOB MARKET

### Creative Futures

Are you a creative person? Do you dream of working in arts, design or media? Are you worried that creative jobs only exist for a lucky few? Think again!

The creative industries span advertising and marketing, animation, arts and culture, crafts, computer games, design, fashion, film, music, social media, textiles, TV, video, photography, performance and more.

They generate £21.2bn in turnover every year, and people employ over 2 million in the UK. The creative industries are an important part of the West Midlands too providing around 50,000 jobs, and generating over £4 billion “gross value added”.

The industries are exciting, vibrant and developing all the time, providing huge societal benefit, and creating new jobs in response to new technology and ideas. For example, our increasingly digitised world has resulted in a big demand for anyone who can tell stories, create content, communicate with audiences, inform and entertain. And with a world that is increasingly sensitive to diversity and inclusion, arts plays an important role in reaching out to helping people belong to their communities and cope with challenges such as disability, mental health, isolation and past traumas.

Creative Futures: learn about creative career possibilities from our guest speakers

The Wolverhampton School of Art and School of Performing Arts at Wolverhampton University have a long history of preparing students for the creative industries. With the University’s Careers Centre, we have put together a series of talks featuring guest speakers (many University of Wolverhampton alumni) who work in different creative professions and scenarios. The talks aim to inform and inspire, covering the career trends you need to know about if you want a creative career.

The talks cover hot topics including:

- Different examples of creative careers, jobs and places you can work – our guest speakers have built exciting, successful creative careers and you can too!
- Freelancing as a common mode of work: what it’s like, how it’s not as scary as you might think and how you can get support to get started

# Classroom to career

Careers newsletter for families – January /February 2022

- Building your creative community – often it's said that "making it" depends on who you know. This is only partially true, but can be extremely beneficial for mutual support, collaboration, advice and finding work opportunities
- Change as a typical part of a creative career and how your career might evolve to include an exciting array of employers, projects, collaborative teams, and subject areas
- Feeling confident about who you are, your creative ideas, your skills and abilities
- Building your technical skills and portfolio of work and how determination and persistence pays off

Access our Creative Futures Talks! See Autumn 2021 Creative Futures recordings as [www.wlv.ac.uk/creativefutures](http://www.wlv.ac.uk/creativefutures)

We are planning our Spring 2022 series which will include careers areas such as fine art, music therapy, product design, theatrical event production, arts teaching and photography. To celebrate the launch of our new Screen School, we are also planning a media event covering careers in

journalism, animation, games, TV and film production and VFX. Details will be published at [www.wlv.ac.uk/creativefutures](http://www.wlv.ac.uk/creativefutures)

Access information about University of Wolverhampton Creative Courses

To see the range of courses that can launch your creative career and to find out a bit more about how we support your employability see: [Wolverhampton School of Art School of Performing Arts](#)
